

# Passkeys User Guide – ePramaan

## Content:

1. What is the Passkeys 1
2. How to register using Passkeys 3
3. How to login using Passkeys 5

## What is Passkeys?

A passkey is a way to log in without a password, using your fingerprint, face, or phone PIN.

The graphic features logos for the Ministry of Electronics and Information Technology, CDAC, and e-Pramaan. It includes a central headline, a paragraph about the new feature, and four key benefits: Phishing Resistance, Biometric Authentication, Built on FIDO Standards, and Passwordless Experience. A smartphone and laptop display the e-Pramaan interface with the 'Try Passkey Sign in' button highlighted.

**Looking for a faster way to sign in?**

## The Future Of Authentication Is Here: Say Hello To Passkeys.

e-Pramaan is excited to introduce Passkey support alongside our existing sign-in options. In an era of evolving cyber threats, Passkeys give you the choice to move beyond passwords with hardware-backed security. Simply use your fingerprint, Face ID, or screen lock for a seamless, phishing-resistant login.

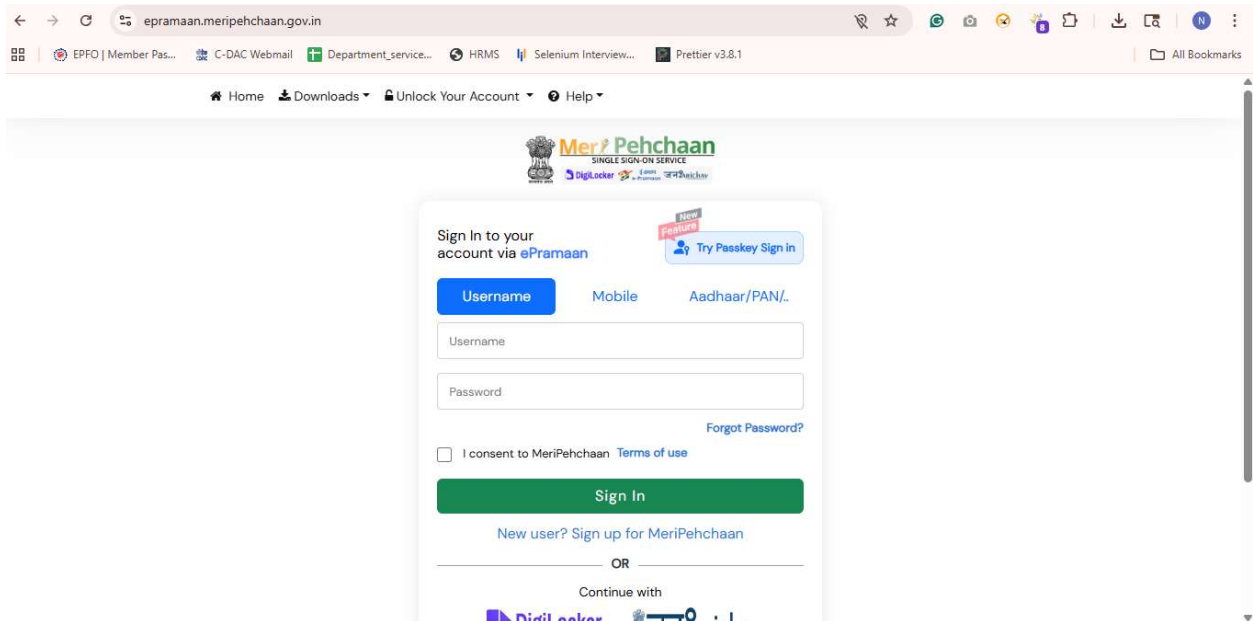

- Phishing Resistance**  
Passkeys are cryptographically tied to specific websites, making them impossible to use on fraudulent or spoofed domains.
- Biometric Authentication**  
Users log in instantly using built-in device sensors like fingerprint scanners or facial recognition.
- Built on FIDO Standards**  
Passkeys are based on FIDO (Fast Identity Online) and W3C WebAuthn standards. They use asymmetric cryptography.
- Passwordless Experience**  
Eliminates the need to create, remember, or periodically reset complex character strings.

**New Feature**  
Try Passkey Sign in

## How to Register Passkeys?

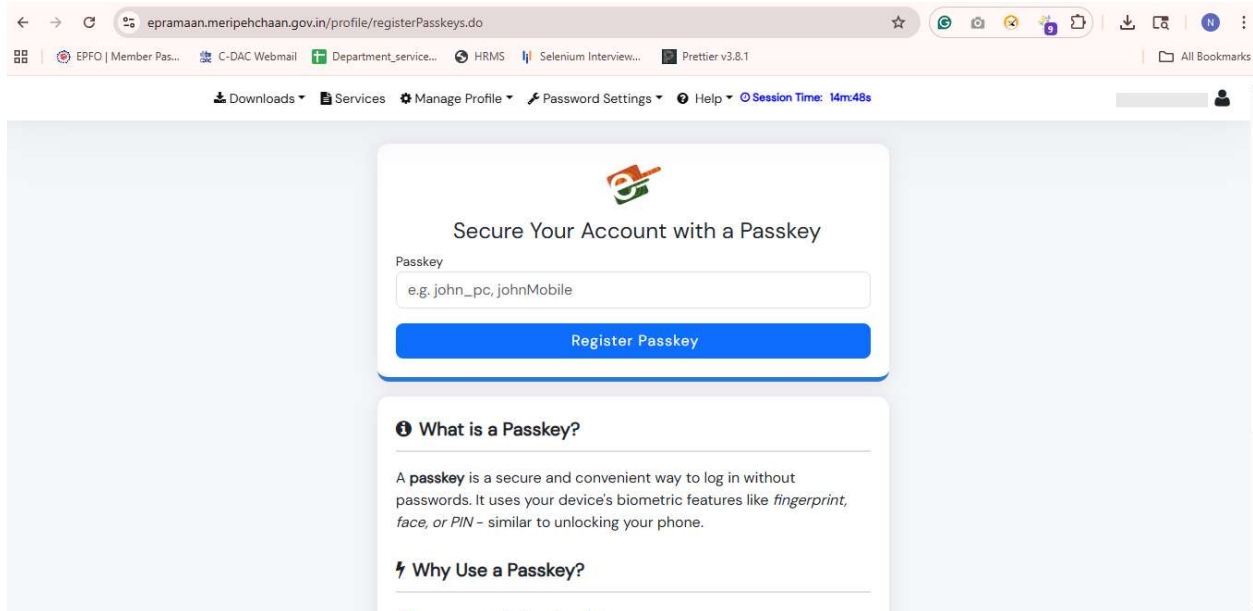

- 1) Log in to your ePramaan using your username and password using below link.  
<https://epramaan.meripehchaan.gov.in/>

- 2) Go to Password Settings → Register Passkeys.

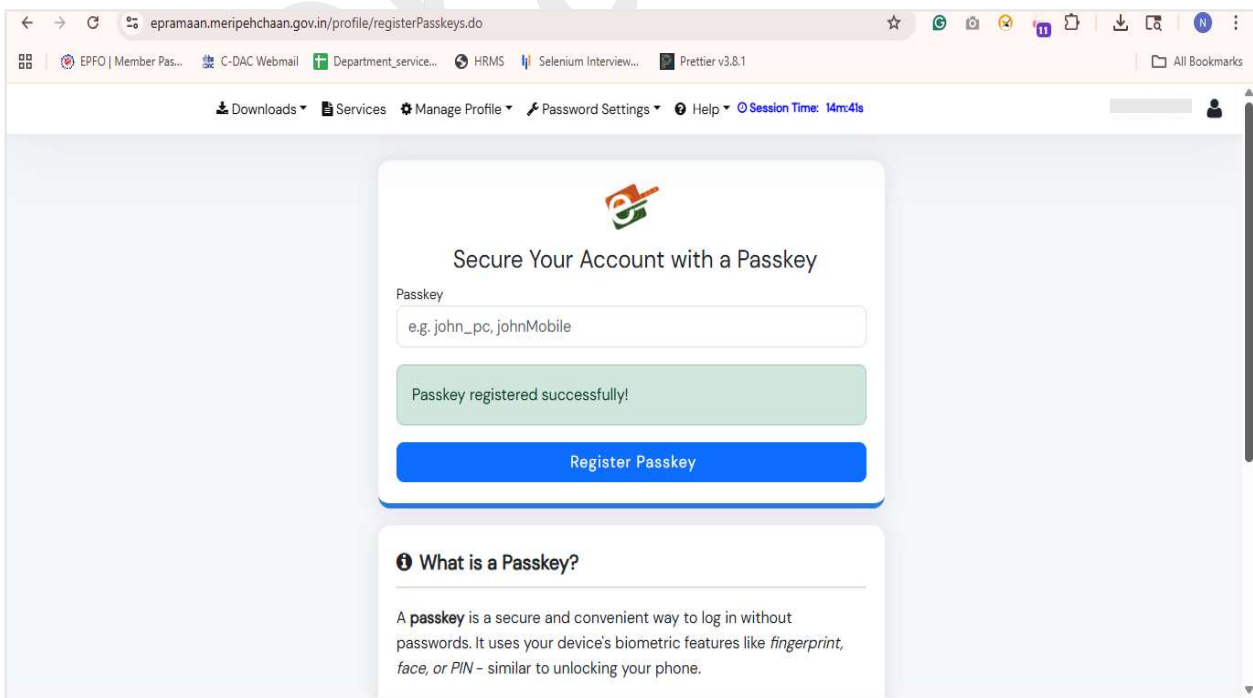

3) Enter a label to identify the device you're registering (e.g., john\_pc or john\_pk\_mobile).

4) Click Register Passkeys.

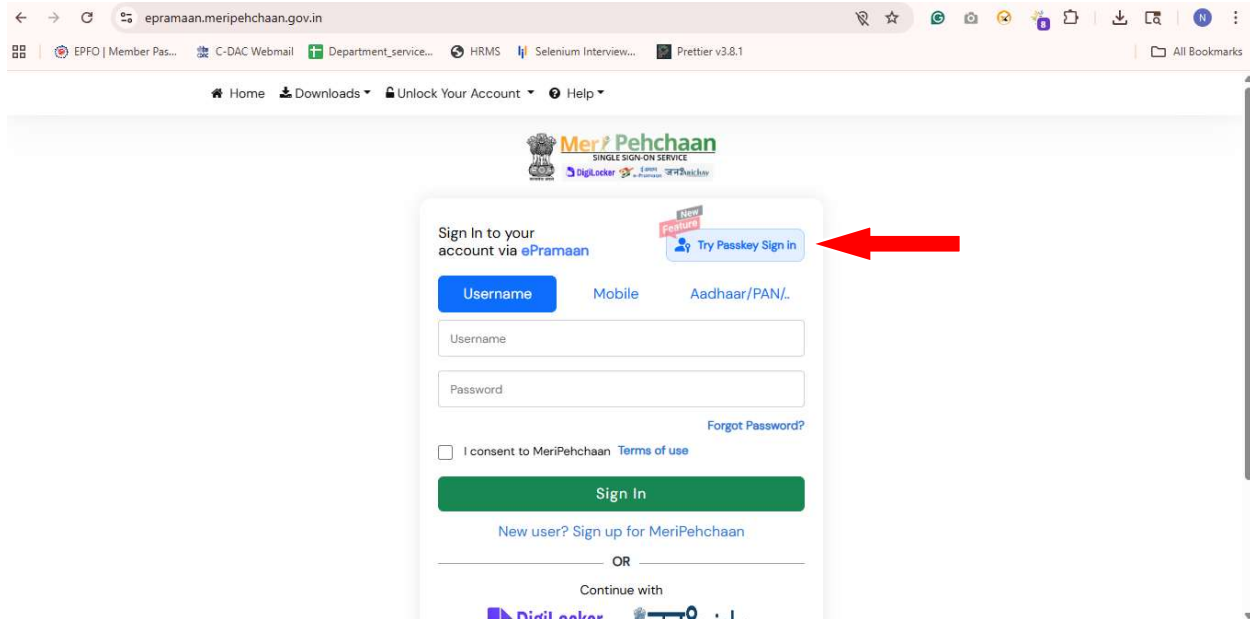

5) Follow the instructions shown by Windows Security to complete the registration.

6) Once the process is successful, you'll see a confirmation message from Windows Security.

## How to Login with Passkeys?

- 1) Go to the ePramaan home page.
- 2) Click the "Login Using Passkeys" button.

- 3) Enter your username (the one you registered the Passkey with) and click "Login Using Passkeys".
- 4) Windows Security will prompt you to authenticate using your fingerprint, PIN, or password.
- 5) If verified successfully, you'll be redirected to your dashboard.
